

To whom it may concern:I am urging the FCC to reject the NAB's petition 04-160 which would limit XM satellite radio from broadcasting Instant traffic and weather information which is beneficial to subscribers of the system. I have subscribed to XM satellite radio to benefit from it's many diverse features and feel this petition does not support my ability to freely access information and services which are now offered.

Thank you for your consideration in this matter.

Sincerely,

Jason Clark
